

Section 1: Overview

The client seeks an AI-enabled clinical operations assistant to reduce manual triage effort by 40 percent.

Section 2: Mandatory Requirements

The solution **MUST** provide citation-grounded answers for every generated response.

The platform **MUST** support encryption at rest and in transit and role-based access controls.

The solution **SHOULD** integrate with existing EMR and CRM systems using secure APIs.

The system **SHOULD** meet P95 latency under 2.5 seconds for common workflows.

Section 3: Compliance and Security

All data must remain in US regions. SOC2-aligned controls are mandatory.

PII and PHI data should be redacted in logs and prompts.

Section 4: Operations

Client prefers Azure due to existing enterprise agreement.

Required uptime SLA is 99.9 percent.
